City of Richmond Ecological Network Management Strategy 2018 Update

ECOLOGICAL NETWORK MANAGEMENT STRATEGY

Richmond City Council adopted the Ecological Network Management Strategy in September 2015 with a specific vision:

"The Ecological Network (EN) is the long-term ecological blueprint for the collaborative management and enhancement of the natural and built environments throughout the city, within neighbourhoods, and across land-uses and development types in order to achieve ecologically connected, livable and healthy places in which residents thrive."

In support of that vision, the Ecological Network Management Strategy (the Strategy) outlines detailed actions and initiatives developed under four focus areas:

- 1. Green Infrastructure and Development
- 2. Vegetation, Habitat and Wildlife
- 3. Parks and Public Spaces
- 4. Stewardship and Collaboration

This document and the statistics provided herein, serves to provide an update on actions taken in support of initiatives identified in the Strategy since its 2015 adoption and highlight future actions.

The Strategy received the Silver Award for Excellence in Policy Planning from the Planning Institute of BC

GREEN INFRASTRUCTURE AND DEVELOPMENT

OVERARCHING OBJECTIVES

- 1. Protection of riparian areas
- 2. Connecting & enhancing wildlife corridors
- 3. Increasing ecological services

Green infrastructure uses methods that mimic natural systems to provide services and achieve multiple benefits. From rainwater management systems to district energy utilities, 'green' design initiatives have become integral to the EN's success.

KEY ACHIEVEMENTS

Development Application Compensation: Through its Environmentally Sensitive Area (ESA) Development Applications from September 2015 to the present, an area of approximately 8,015 m² has been compensated for by adding over 7,000 native trees and shrubs to Richmond.

Sidaway Drainage Improvement Project: Civil improvements (culverts) and ecological enhancements (native plantings) to approximately 1,800 m of channelized watercourse along Sidaway Road and Steveston Highway.

Metro Vancouver's Lulu Island Waste Treatment Plant Expansion:

Through the ESA DP, the compensation involved the removal of invasive species, ecological habitat replacements at a 3:1 compensation ratio, with over 4,000 new plantings on Iona Island.

8,015 m²

1,188 native trees &

6,475

Stormwater Management: Throughout the City, several green infrastructure solutions using stormwater have been provided through development including:

- Hollybridge Canal rain garden;
- Oval Village rain gardens (Intracorp and Cressey developments);
- Stormwater detention for the Gardens Development and adjacent Gardens Agricultural Park; and
- Translink (Boundary Rd.) rain garden.

Alexandra District Energy Utility (ADEU): Established a green roof approximately 240 m² that includes native grasses and sedums to control storm water runoff.

Railway & West Cambie Greenways: Required significant tree retention, new plantings, and a rain water management system to extend the ecological function of the corridor.

Richmond Middle Arm Waterfront Park Brownfield Action Plan: Initiative to restoration and develop a waterfront park that has been subject to impacts from soil and groundwater contamination due to historical uses.

FUTURE ACTIONS

Pump Station Actuator Upgrades (Bridgeport, Horseshoe Slough & Future Sites): Upgrades will allow for the controlled exchange of water between the Fraser River and Bath Slough to improve water quality and restore the slough's natural water cycle.

Integrated Rainwater Resource Management Strategy: Continue the strategic implementation of water detention measures, such as storage ponds that have additional benefits for the City such as water reuse and ecological and aesthetic value.

ADEU building green roof planting palette.

VEGETATION, HABITAT, AND WILDLIFE

OVERARCHING OBJECTIVES

- 1. Identify areas of opportunity
- 2. Retain and enhance existing vegetation
- 3. Strengthen connectivity

Richmond is home to a unique mix of diverse ecological places; many of which are managed through a range of municipal, provincial and federal jurisdictions. The EN seeks to protect these areas and actively monitored and enhanced over time so they continue to provide the ecological services vital to community health.

KEY ACHIEVEMENTS

Riparian Response Strategy: Enhanced approximately 2.1 ha (21,000 m²) of disturbed riparian habitat with native plantings through residential, commercial and industrial developments approvals.

Knotweed Treatment: Identified in the ISAP, the City treated 260 knotweed infestations throughout the EN, equal to approximately 2.5 ha of habitat.

Cornerstone Evangelical Baptist Church and Christian Academy:

Remediated a portion of the ESA that was previous disturbed with unauthorized changes and replanted with native trees and shrubs. 2.1ha

of riparian enhancements through development projects

2.5ha of knotweed treated **Bridgeport Industrial Park Pollinator Pasture:** Converted approximately 3,000 m² of underutilized land at Bridgeport to a wildflower pasture to benefit native pollinators.

David Suzuki Foundation's Butterfly Rangers: Worked with the Richmond Butterflyway Rangers who are responsible for planting pollinator patches in 21 locations throughout Richmond, including City Hall.

Barn Owl Nest Box Program: Four barn owl boxes installed at Terra Nova Rural Park and West Cambie Park to promote nesting and two fixed with monitoring cameras were installed at the Alexandra District Energy Utility Building.

Jayden Mews Development: Townhouse development north of Garden City Lands that included 374 m² of enhanced area and visible artwork that functions as barn owl habitat.

Snow Goose Cover Crop Program: Provided 100 acres of wildlife habitat within the Agricultural Land Reserve for migrating snow geese to utilize each season.

Bath Slough Revitalization: In addition to a pollinator pasture, revitalization efforts included 250 native shrubs and trees planted along the slough.

Northeast Bog Conservation Area: On-going study to assess the bog's carbon storage and sequestration capacity to offset the City's greenhouse gas emissions and preserve the unique ecosystem.

Trellis Seniors' Care Facility: ESA restoration in Hamilton that will enhance and combined area of 1,099 m² with native plantings and trees.

FUTURE ACTIONS

Bath Slough Restoration: Restoration will include the removal of various invasive species and replacing this area with native trees and shrubs and ongoing success monitoring

Riparian Response Strategy Update: Will formalize and streamline the RMA application process to improve customer service and allow for success monitoring.

Dr. Cameron Cartier of Border Free Bees accepts the Mayor's Artistic Innovation Award, 2017

PARKS AND PUBLIC SPACES

OVERARCHING OBJECTIVES

- 1. Complement the management & enhancement of ecological assets
- 2. Identify unprotected ecological assets
- 3. Create new protected spaces

Projects can complement the management and enhancement of our ecological assets such as Parks and public spaces. The City has successfully integrated a multitude of projects that have strengthened that Ecological Network, which have been highlighted below as key achievements.

KEY ACHIEVEMENTS

Garden City Lands: A truly unique and made-in-Richmond project that combines initiatives to promote agriculture and ecology stewardship with community wellness and cultural expression. This project will contribute over 1,250 native trees and 15,000 native shrubs while maintaining a portion of the bog's ecological function within the EN.

Railway Greenway: Greenways are fundamental ecological corridors within urban landscapes providing food and habitat for wildlife and opts for active transportation for residents. A significant amount of native tree and shrub planting was completed along the entire greenway in 2017.

Aberdeen Park: The design of this park incorporates multiple objectives, bringing nature into an urban, recreational context with the integration of a rain garden feature.

4,469 trees planted in parks and on streets between 2013 & 2017 **London Landing Park:** Completion of park landscaping includes ESA restoration/riparian plantings along foreshore according to an agreement with FREMP.

FUTURE ACTIONS

Minoru Park Vision Plan: This plan incorporates sustainability measures into the park including utilizing stormwater from surrounding developments and adding ecosystem services throughout the park.

Urban Forestry Management Strategy: When implemented, this strategy will see to the sustainable management of publicly-owned trees throughout the city.

Terra Nova Resource Management Strategy: Once finalized, this strategy will allow the City to better coordinate the multiple functions and programs occurring at the park and provide for new community initiatives that will support the EN.

STEWARDSHIP AND COLLABORATION

OVERARCHING OBJECTIVES

- 1. Ignite collaboration & stewardship through community involvement
- 2. Build and strengthen community relationships within the City through various project initiatives

Central to the continued success of the EN is the active involvement of community members at different scales and levels of participation. The EN seeks to ignite collaboration and stewardship through community involvement and engagement at all levels of EN delivery.

KEY ACHIEVEMENTS

Tree Canada Plantings: Included 90 volunteers from Siemens Canada, IKEA Canada, Shiseido and Ion Trading to plant 730 trees along the Railway Greenway and at Garden City Lands.

TD Tree Days Plantings: Included planting over 1,400 native trees and shrubs by 130 volunteers and members from TD Bank.

Partners for Beautification Program: Allows community members to adopt streets, gardens, parks, trails, and open spaces to proactively remove litter and invasive plants from these areas.

Enhanced Pesticide Management Program: Reduces exposure of unnecessary pesticide use for residents and empowers community members to make the switch to pesticide free practices.

Environmental Workshops & Events: Delivered 49 free workshops that have attracted over 700 residents since 2016 and included topics such as Natural Lawn Care and Organic Gardening, to Bee Identification and Fruit Tree Management.

465 volunteers participated in planting over

3,200 native trees & shrubs

Our Home and Native Bloom: Successful community project on display at City Hall to promote Richmond's unique island ecology through educational talks and stewardship events.

Project Wet: In partnership with Richmond elementary school teachers and City of Richmond Public Works, this project is an interactive elementary school science program aimed at educating students about the importance of potable water in Richmond.

Public Work Open House: This interactive event offers a hands-on experience for residents including plenty of activities for all ages, including awareness about Richmond's unique environment.

Sustainability in Action Videos: Several short videos produced by the City to highlight the actions that Richmond is taking to achieve a more sustainable community.

Richmond Earth Day Youth (REaDY) Summit: Through the unique partnership of the City of Richmond, the Richmond School District, and the David Suzuki Foundation, REaDY helps build capacity for environmental education amongst Richmond high school and elementary students and has attracted over 1,500 participants to date.

FUTURE ACTIONS

Terra Nova Pollinator Pasture: Continue the successful partnership with Emily Carr University to establish a new 2,500 m² pollinator meadow at Terra Nova in 2018.

Interactive Chafer Beetle Videos: A new series of videos prepared to educate, inform and assist residents in dealing with chafer beetle infestations.
