Re: 5098 EOI – Design Build of a Fire and Life Safety Mobile Trailer for Richmond Fire Rescue

This Addendum includes items of clarification; forms part of the Contract Documents and shall be read, interpreted and coordinated with all other parts. Please review and consider the following information in the preparation of your Proposals:

Questions and Answers:

Question #1

You ask for a trailer to be built that is 9ft wide, in the US, we are only allowed 8 1/2 ft (102" = 2.6 meter) width. I have not seen anything online to indicate a 9ft width is legal in US or Canada.

Answer #1

Width between 7.5' and 8.5' is acceptable, so we could accept 8'.

Question #2

I have a question about the minimal specifications provided 27X9X10. Some manufacturers measure the box of a trailer and do not count the hitch tongue in their call size so one could say a 30 ft overall length trailer is a 27 ft trailer if you do not count the tongue.

Answer #2

The length is 27' not including the tongue.

Question #3

As for the content, I see there are going to be instructional programs within this vehicle, am I to understand the purpose and extent of this EOI is solely for the vehicle itself and not the training equipment, media, presentation, content etc.?

Answer #3

We are looking for the trailer to come equipped with the props.

End of Addendum #1

Regards,

Julia Turick
